

Modifying an Adult mask for kids

<https://www.asiaone.com/lifestyle/heres-how-quickly-modify-adult-sized-disposable-face-mask-fit-your-kid>

Step 1:

On the outer side of the mask, in a vertical position, take the left end of the mask and fold it to the centre.

Step 2:

Repeat step 1 with the right end of the mask.

Step 3:

Hold it in place and tie a knot as close as possible to the strap.

Step 4:

Repeat steps 1 to 3 for the other side of the mask.

Step 5:

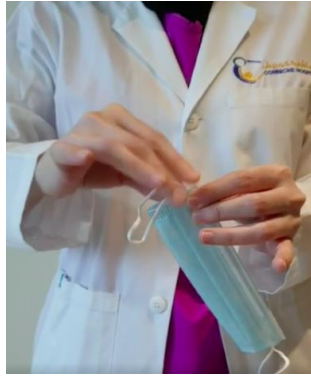

Flip the mask inside out so that it is opened and expanded. The outer side of the mask should be protruding out.

Here is another [similar method](#) to resize an adult mask to a smaller mask.

Step 1: Fold the mask into half.

Step 2: Tie a knot on the straps on each side of the mask.

Step 3: Open up the mask and push the outer side of the mask inwards, to close up the gaps on both sides.
