

NEURORELATIONAL FRAMEWORK (NRF) WORKSHOP

WHERE: ElmTree Clinic at 10010 – 162 Street

WHEN: Saturday, September 29, 2018
9:00 am to 1:00 pm

FEE: \$60 per participant; no charge for students

- ✓ e-mail ca.hapchyn@gmail.com to register
- ✓ cheque payable to ElmTree Clinic or e-transfer at time of registration

Limited to 24 participants (professionals from all disciplines welcome).

We will have a short break mid-morning with a healthy snack, coffee and tea provided.

Please arrive at 845 am to have time to settle in.

ElmTree Clinic in association with NRF Global Communities is pleased to offer an introductory workshop about the NeuroRelational Framework. Dr. Brandene Lorrain and Dr. Carole Anne Hapchyn are NRF trainers and mentors. The three steps of the NRF will be reviewed, how to identify:

1. Toxic stress responses
2. Quality of relationships relationships
3. Strengths and vulnerabilities of brain architecture

ElmTree Clinic is a mental health clinic for infants and preschool children and their families. Our focus is to understand children in the context of their families and the community around them. We aim to partner with parents, other health care providers and community professionals to collaboratively create intervention plans for children. We use current research about brain development to guide our practice.

NRF Global Communities (www.nrf-gc.org) is a non-profit that offers educational training to culturally and racially diverse cross-sectored communities with at-risk infants, young children, youth, and families, based upon the NeuroRelational Framework (NRF). Cross-sectored communities include, but are not limited to, practitioners and home visitors that work in medical and maternal-child health, early intervention, mental health, early care and education, and child welfare. On a community level, we are committed to train communities across systems of care in a common language about development, and a shared approach for assessment and intervention.
